Keeping our Customers Informed

Customer Breakfast & Technology Update

Canadian government agencies and large corporations are some of AVW-TELAV's most valued customers and beneficiaries of many of our most highly-successful and cutting-edge permanent installations. As such, we are committed to keeping these sectors up-to-date on what's most current and capable in the world of system design and integration solutions.

Rave Review

On December 4th, 2009, at the Minto Suite Hotel in Ottawa, ON, AVW-TELAV teamed up with Kees Geerts, Bosch's Product Marketing Manager, and Ronnie Forgione, Crestron's Regional Sales Manager, to give customers a sneak peek at the latest technology solutions for today and tomorrow and answer any questions about the new "Digital Era."

With 45 people representing nine different government agencies and 12 large corporations, the three-hour seminar turned out to be a complete success. Moreover, said Stuart Weinman, Director of Sales, SDI, "it not only gave AVW-TELAV the opportunity to show customers the new technology that is right around the corner, but it also positioned us to have very strong relationships with highly-reputable and well-known manufacturers in the technology world."
